For the past 10 years I have been working in the Oil and Gas industry as a drafter and designer. I recently decided I needed a change and began the journey of learning front end web development. I have been following online courses such as CodeCademy, FreeCodeCamp, Udemy and Udacity. I really enjoy working with JavaScript and React. I love learning new things and hope to get a position so that I can grow with a company while continuing to grow my knowledge of programming.
